Subject: Microsoft DOJ Settlement

Dear DOJ,

I think that allowing Microsoft to provide schools with their software will eventually lead to the demise of Apple Computers.

It just does not make any sense to me to do this.

Microsoft provides software and then corners the market in the schools.

They already have the business market cornered.

This settlement will insure that Microsoft will continue to grow and will be a huge anti trust problem.

Think about it gentlemen.

Sincerely,

Ron Martin
